

Flagstaff Counseling Center WiFi

WiFi: we have three separate routers at FCC that all work together to function as a single wifi network called “fcc-wifi” The password is available upon request from partners.

Please do not give out the wifi password to clients.

Your phone/laptop should auto-connect to whichever is the strongest signal, based on your location. These routers all reboot in the early morning once per day around 4am. The three highest signal curves below are our three routers. The rest are other business/personal routers in the building/neighborhood.
